QUICK GUIDE

The box and the cover of the Baby Book are produced with touch art matte, available in various colours. Alternatively it is possible to print colour images on the upper internal part of the box and on the cover.

ONLINE ORDER FORM

Use the new online order form available in the trade Area to order your BABY BOOK. You will be able to choose among the various touch colours available, or freely design the cover and the bottom internal of the box. A real time preview of the design helps choosing the most appropriate chromatic combinations.

Colour overprinting.
Printing of the customization with a colour and a font of your choice, with the option of enriching it with raised varnishing.

Internal of the box.
The touch colour chosen for the internal of the box will be applied to both the upper and bottom parts. When a colour print is chosen instead, the bottom part will reflect the same touch colour of the box.

DESIGN

Click on the DESIGN button to launch the design software

DESIGNING THE COVER AND THE BOTTOM BOX INTERNAL

By clicking on the DESIGN button you will gain access to the design tab. This section allows to import and design images by combining them with the available backgrounds, frames and effects. A 2D preview can be visualized by returning back to the order form.

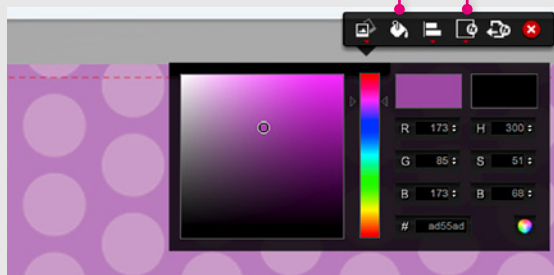

Apply the same background of the cover.

This button takes you back to the 2D version, with the preview of the images within the box.

Modify the background colour
Modify the texture colour

Palette.

By selecting various elements such as textures, frames, images and effects you will activate the relevant palettes: this option will allow you to modify colours, dimensions or create specific effects.

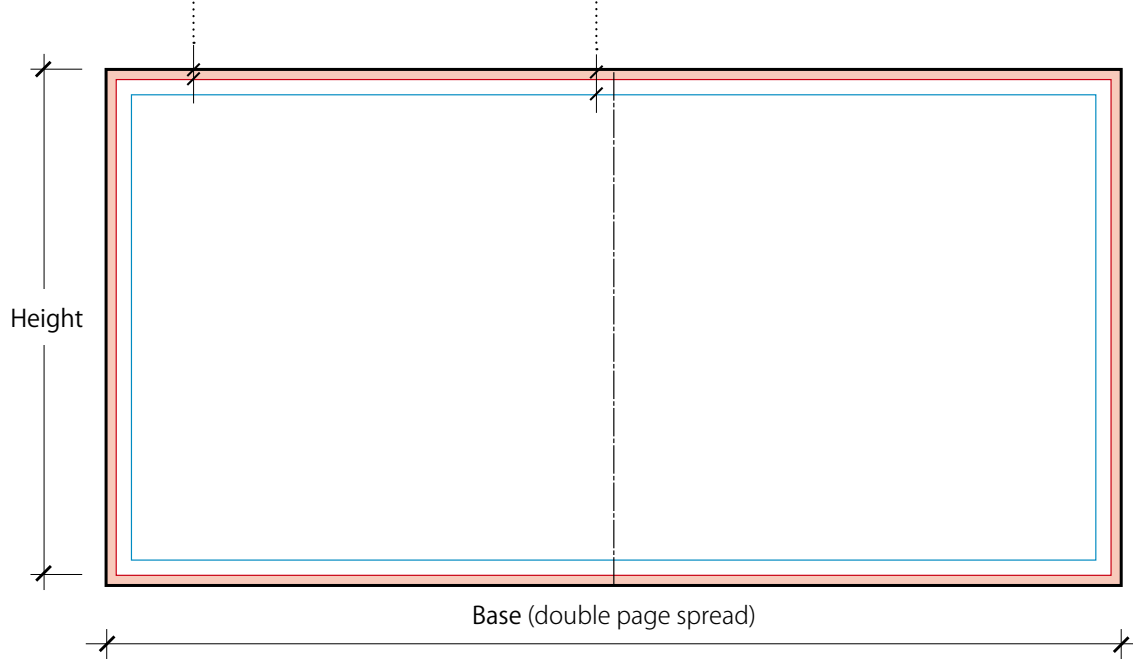

Print and Bind book measurements

Bleed*

Bleed is the part of the image which is cut off during the final crop. This tolerance is necessary as the actual trim of the book might differ a few millimetres.

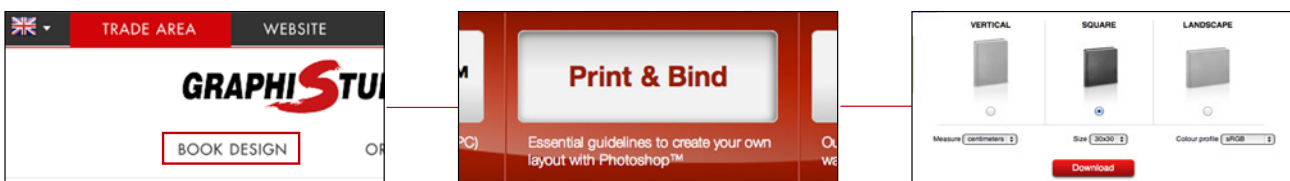

Suggested margin**

To avoid having important elements such as heads, feet, frames... too close to the edge or cut off after the cropping phase, we suggest not to position images beyond the value indicated by the guide.

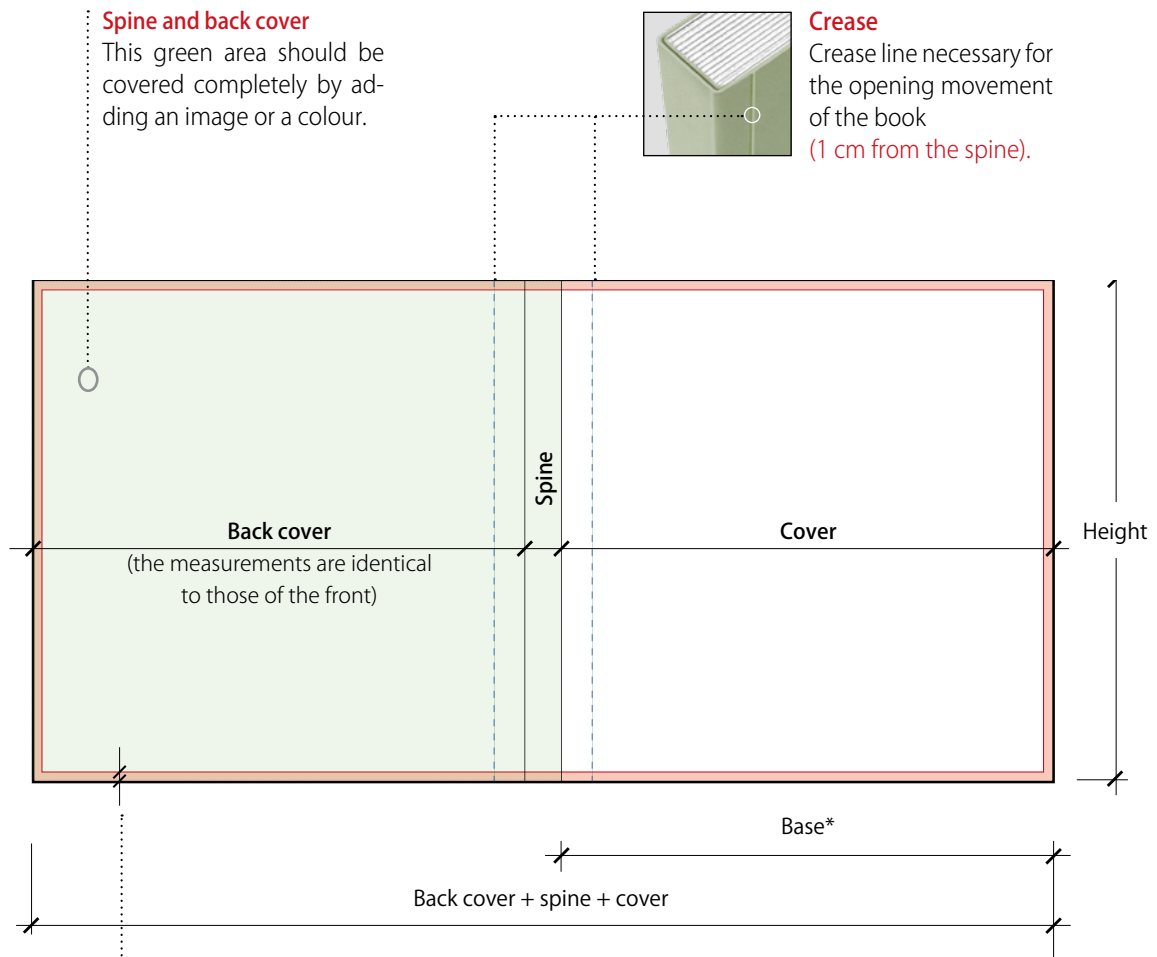

SQUARE	BASE cm.	HEIGHT cm	BLEED* mm	SUGGESTED MARGIN** mm	SUGGESTED RESOLUTION DPI
20x20	40,6	20,6	3	12	300

Print and Bind cover measurements

Bleed Bleed is the part of the image which is cut off during the final crop. This tolerance is necessary as the actual trim of the book might differ a few millimetres. **Always make sure that the images go all the way up to the edge of the canvas.**

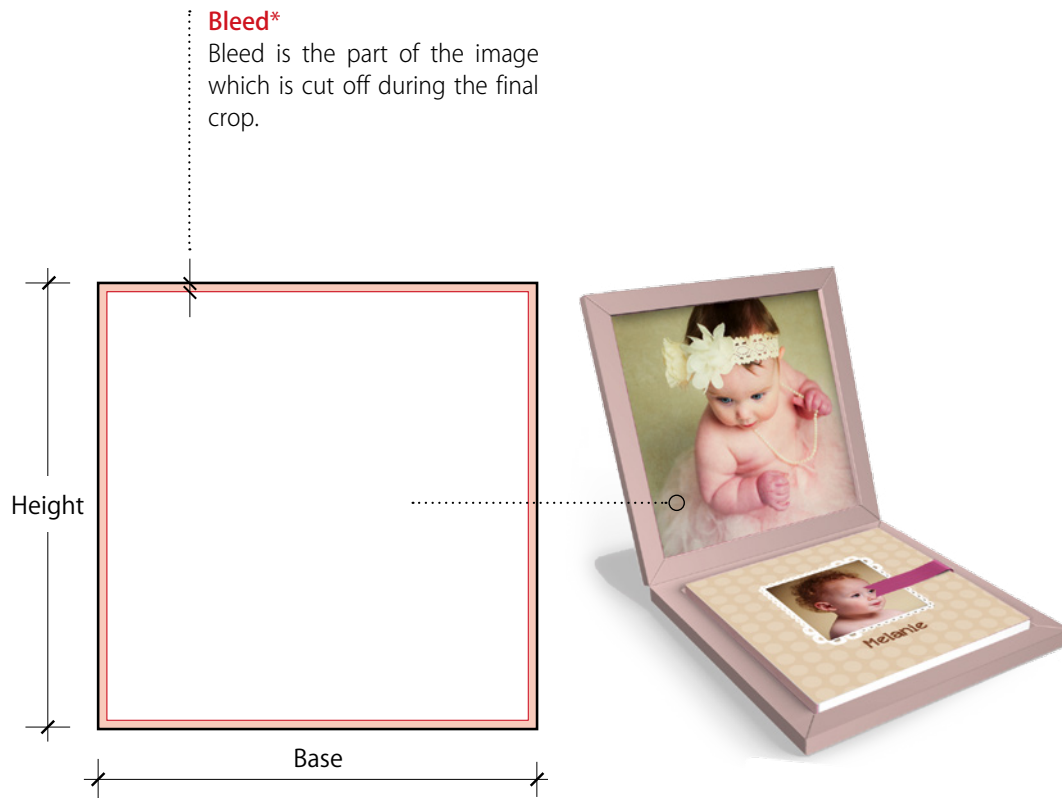

Square	BASE cm.	HEIGHT cm.	BLEED* mm.	SUGGESTED RESOLUTION DPI
20x20	20,5	20,6	3	300

SPINE		
PAGES QUANTITY	20-30	32-40
SPINE cm.	1,7	2,2

*Base. This measurements apply to the cover and to the back cover.

Example. 20x20 book, 20 pages: $20,5+1,7+20,5 = 42,7$ cm

Print and bind measurements for the internal of the box.

Square	BASE cm.	HEIGHT cm.	BLEED* mm.	SUGGESTED RESOLUTION DPI
20x20	21,5	21,5	3	300
